

Arthur Ottevaere

MSc Business Engineering — Business Analytics

Belgium | +32 473 18 29 78 | arthurottevaere7@gmail.com | LinkedIn | GitHub | Portfolio

EDUCATION

Academic Exchange Program

Courses: Corporate Strategy, Supply Chain, Strategy of Innovation

Rotterdam School of Management, NL

Sept. 2026 – Dec. 2026

Master in Business Engineering – Business Analytics

Courses: Machine Learning, Optimisation, Web Mining, Recommender Systems

UCLouvain FUCaM Mons, Belgium

Sept. 2025 – Jun. 2027

Bachelor of Business Engineering

Cum Laude — Courses: Econometrics, Statistics, Data Management, Finance

UCLouvain FUCaM Mons, Belgium

Sept. 2022 – Jun. 2025

EXPERIENCE

Data Consultant Intern (incoming)

Easi – Data4Decisions

Feb. 2027 – May 2027

Nivelles, Belgium

- Selected for a 14-week internship building BI and data solutions for clients in various domains such as healthcare, construction and industry.

Business & Data Analyst Intern

Global Net (Bunzl Group)

Jan. 2025 – Feb. 2025

Tournai, Belgium

- Analysed margin and rotation across a multi-thousand-SKU catalogue and built a dynamic Excel tool surfacing higher-margin substitutes to guide assortment decisions.
- Cleaned customer databases (duplicates, missing records) and worked across finance, accounting, logistics and product teams to validate assumptions.

Student Employee

Colruyt Group

Feb. 2022 – Present

Tournai, Belgium

- Handled inventory restocking, cold storage operations and customer checkout in high-volume retail.

PROJECTS

Surgical Block Scheduling Optimisation — CHwapi | XPress Mosel, Python, MIP

2026

- Multi-objective MIP scheduling 57 surgeons over 10 disciplines, 17 operating rooms and a 54-bed day hospital, for a three-site merger.
- Found the 10-change optimum on the disruption/performance Pareto front, clearing a 2.4-bed overrun; a transfer mechanism raised failure resilience from 2 to 9 disciplines out of 10.

Movix — Recommender System & Web App | Python, scikit-surprise, implicit, scikit-learn, FastAPI

2026

- Trained and served five recommenders (RidgeCV, user-based kNN, iALS, BPR, and a from-scratch Jaccard similarity), with folding-in for real-time cold-start users.
- Built an offline evaluation pipeline covering RMSE/MAE, Hit-Rate@K, NDCG@K, catalogue coverage, novelty and diversity.

F1 Duel — Prediction Game (personal project) | Python, XGBoost/LightGBM, Next.js

2026

- Designed and shipped a season-long game where players predict each Grand Prix top 10 against a machine-learning benchmark, including a rarity-weighted scoring system, leagues and championship picks.
- Specified the product around an XGBoost/LightGBM ensemble trained on eight F1 seasons, surfacing SHAP-based driver factors and Monte-Carlo win probabilities in the interface.

SKILLS & CERTIFICATIONS

Programming & Data: Python (Pandas, NumPy, Scikit-learn, XGBoost, LightGBM, Surprise, FastAPI), SQL, R, Git

Optimisation & BI: XPress Mosel (MIP), Power BI, Advanced Excel, LaTeX

Languages: French (native), English (C1 — IELTS Academic), Dutch (B2)

Certification: Google Data Analytics

Leadership: Founder & Coach, UCLouvain Running Club (2024–2026): built from scratch to around 30 members | Campus Leader, Notion (2024–2025) | Youth Handball Coach, EHC Tournai (2022–2023)
